

Orion product overview

ENG-001 | Engineering | PRODUCT DOCUMENTATION | Version 2.0

Document control	Value
Access level	PUBLIC
Effective date	2026-04-01
Status	current
Owner	Engineering process owner
Scope	Meridian Works fictional enterprise; all locations unless stated otherwise

Purpose and scope

This product documentation describes orion product overview for Meridian Works. It is part of a wholly fictional enterprise knowledge base created for SynapseIQ retrieval experiments. The rules and figures below are invented operational assumptions, not real company rules or professional guidance.

Key requirements

1. Orion is a fictional workflow analytics service.
2. Orion exports CSV and JSON reports.
3. Scheduled exports support at most 25 destinations per workspace.

Authority: effective from 2026-04-01. If a local quick guide disagrees, use the current approved controlling policy and record the discrepancy.

Orion product overview - 2/5

Behavior and constraints

Orion is a fictional workflow analytics service.

Orion exports CSV and JSON reports.

Worked product example

Workspace Cedar Demo uses a synthetic project named Orion Trial 2. An employee requests a report for a selected date range, checks the workspace scope and confirms the resulting job status. Product behavior must be evaluated against the documented version; an archived client example may use a different pagination model.

Example attribute	Synthetic value
Workspace	MDEMO-01
Reference	DOC-ENG-001-02
Report status	queued -> processing -> completed
Failure handling	Display a safe explanation and retain the request reference
Visibility	Only the authorized workspace audience receives the output

Troubleshooting

An empty result may reflect filters, workspace scope or missing input data. Confirm those factors before interpreting the result as a system failure. Do not broaden access solely to obtain a result.

Orion product overview - 3/5

Behavior and constraints

Orion exports CSV and JSON reports.

Scheduled exports support at most 25 destinations per workspace.

Worked product example

Workspace Cedar Demo uses a synthetic project named Orion Trial 3. An employee requests a report for a selected date range, checks the workspace scope and confirms the resulting job status. Product behavior must be evaluated against the documented version; an archived client example may use a different pagination model.

Example attribute	Synthetic value
Workspace	MDEMO-01
Reference	DOC-ENG-001-03
Report status	queued -> processing -> completed
Failure handling	Display a safe explanation and retain the request reference
Visibility	Only the authorized workspace audience receives the output

Troubleshooting

An empty result may reflect filters, workspace scope or missing input data. Confirm those factors before interpreting the result as a system failure. Do not broaden access solely to obtain a result.

Orion product overview - 4/5

Behavior and constraints

Scheduled exports support at most 25 destinations per workspace.

Orion is a fictional workflow analytics service.

Worked product example

Workspace Cedar Demo uses a synthetic project named Orion Trial 4. An employee requests a report for a selected date range, checks the workspace scope and confirms the resulting job status. Product behavior must be evaluated against the documented version; an archived client example may use a different pagination model.

Example attribute	Synthetic value
Workspace	MDEMO-01
Reference	DOC-ENG-001-04
Report status	queued -> processing -> completed
Failure handling	Display a safe explanation and retain the request reference
Visibility	Only the authorized workspace audience receives the output

Troubleshooting

An empty result may reflect filters, workspace scope or missing input data. Confirm those factors before interpreting the result as a system failure. Do not broaden access solely to obtain a result.

Orion product overview - 5/5

Behavior and constraints

Orion is a fictional workflow analytics service.

Orion exports CSV and JSON reports.

Worked product example

Workspace Cedar Demo uses a synthetic project named Orion Trial 5. An employee requests a report for a selected date range, checks the workspace scope and confirms the resulting job status. Product behavior must be evaluated against the documented version; an archived client example may use a different pagination model.

Example attribute	Synthetic value
Workspace	MDEMO-01
Reference	DOC-ENG-001-05
Report status	queued -> processing -> completed
Failure handling	Display a safe explanation and retain the request reference
Visibility	Only the authorized workspace audience receives the output

Troubleshooting

An empty result may reflect filters, workspace scope or missing input data. Confirm those factors before interpreting the result as a system failure. Do not broaden access solely to obtain a result.
