|------------------|----------------------------------------------------------------------------|
| Access level     | INTERNAL                                                                   |
| Effective date   | 2026-04-01                                                                 |
| Status           | current                                                                    |
| Owner            | IT process owner                                                           |
| Scope            | Meridian Works fictional enterprise; all locations unless stated otherwise |

## Purpose and scope

This onboarding guide describes email migration onboarding for Meridian Works. It is part of a wholly fictional enterprise knowledge base created for SynapseIQ retrieval experiments. The rules and figures below are invented operational assumptions, not real company rules or professional guidance.

## Key requirements

1. Mailbox migration batches are limited to 40 users.
2. Users verify calendars on the first day after migration.
3. Shared mailboxes require an assigned custodian.

Authority: effective from 2026-04-01. If a local quick guide disagrees, use the current approved controlling policy and record the discrepancy.

# Email migration onboarding - 2/4

## Procedure and responsibilities

1. The requester states the business purpose and affected scope. Mailbox migration batches are limited to 40 users.
2. The assigned owner checks completeness and applies the relevant rule. Users verify calendars on the first day after migration.
3. The reviewer records the decision, required evidence and any approved exception. The requester receives the case reference and next action.
4. The owner verifies completion, documents any unresolved issue and schedules a review if the arrangement remains active.

| Role                 | Responsibility                                                    |
|----------------------|-------------------------------------------------------------------|
| Requester            | Provide scope, requested period and synthetic supporting evidence |
| IT owner             | Interpret the requirement and assign a decision owner             |
| Independent reviewer | Check approval limits and exception evidence                      |
| Record custodian     | Retain the case according to the applicable schedule              |

## Worked scenario

Example SYN-IT-009-02: the Cedar project team submits a request with an incomplete review date. The owner returns the case for clarification instead of assuming approval. Once the date and scope are supplied, the rule is applied and the decision is logged.

## Exception and evidence

An exception must name the approving role, limited scope and expiry. A verbal suggestion or old FAQ does not override the controlling requirement. Store evidence in the authorized workspace and preserve version context.
