Purpose and scope

This product documentation describes enterprise service commitments for Meridian Works. It is part of a wholly fictional enterprise knowledge base created for SynapseIQ retrieval experiments. The rules and figures below are invented operational assumptions, not real company rules or professional guidance.

Key requirements

1. The standard signed Enterprise template commits to 99.5 percent monthly availability.
2. Specific signed contracts may define a different commitment.
3. Internal Engineering targets do not modify contract terms.

Authority: effective from 2026-04-01. If a local quick guide disagrees, use the current approved controlling policy and record the discrepancy.

Enterprise service commitments - 2/3

Behavior and constraints

The standard signed Enterprise template commits to 99.5 percent monthly availability.

Specific signed contracts may define a different commitment.

Worked product example

Workspace Cedar Demo uses a synthetic project named Orion Trial 2. An employee requests a report for a selected date range, checks the workspace scope and confirms the resulting job status. Product behavior must be evaluated against the documented version; an archived client example may use a different pagination model.

Example attribute	Synthetic value
Workspace	MDEMO-01
Reference	DOC-SAL-011-02
Report status	queued -> processing -> completed
Failure handling	Display a safe explanation and retain the request reference
Visibility	Only the authorized workspace audience receives the output

Troubleshooting

An empty result may reflect filters, workspace scope or missing input data. Confirm those factors before interpreting the result as a system failure. Do not broaden access solely to obtain a result.
