

Restricted response roster

SEC-013 | Security | GUIDE | Version 2.0

Document control	Value
Access level	RESTRICTED
Effective date	2026-04-01
Status	current
Owner	Security process owner
Scope	Meridian Works fictional enterprise; all locations unless stated otherwise

Purpose and scope

This guide describes restricted response roster for Meridian Works. It is part of a wholly fictional enterprise knowledge base created for SynapseIQ retrieval experiments. The rules and figures below are invented operational assumptions, not real company rules or professional guidance.

Key requirements

1. The fictional primary incident role is Beacon Commander.
2. The alternate role is Cedar Coordinator.
3. Roster access is restricted to Security responders and incident commanders.

Authority: effective from 2026-04-01. If a local quick guide disagrees, use the current approved controlling policy and record the discrepancy.

Restricted response roster - 2/4

Procedure and responsibilities

1. The requester states the business purpose and affected scope. The fictional primary incident role is Beacon Commander.
2. The assigned owner checks completeness and applies the relevant rule. The alternate role is Cedar Coordinator.
3. The reviewer records the decision, required evidence and any approved exception. The requester receives the case reference and next action.
4. The owner verifies completion, documents any unresolved issue and schedules a review if the arrangement remains active.

Role	Responsibility
Requester	Provide scope, requested period and synthetic supporting evidence
Security owner	Interpret the requirement and assign a decision owner
Independent reviewer	Check approval limits and exception evidence
Record custodian	Retain the case according to the applicable schedule

Worked scenario

Example SYN-SEC-013-02: the Cedar project team submits a request with an incomplete review date. The owner returns the case for clarification instead of assuming approval. Once the date and scope are supplied, the rule is applied and the decision is logged.

Exception and evidence

An exception must name the approving role, limited scope and expiry. A verbal suggestion or old FAQ does not override the controlling requirement. Store evidence in the authorized workspace and preserve version context.

Related search terms

Restricted response roster; Security; SEV, incident response, classification, risk

Restricted response roster - 3/4

Procedure and responsibilities

1. The requester states the business purpose and affected scope. The alternate role is Cedar Coordinator.
2. The assigned owner checks completeness and applies the relevant rule. Roster access is restricted to Security responders and incident commanders.
3. The reviewer records the decision, required evidence and any approved exception. The requester receives the case reference and next action.
